Introduction to Openbrolly

Openbrolly is a small, growing company, founded in 2000 and based in Moray. We work predominantly in the creative industries, developing software for film offices and local authorities.

www.openbrolly.com

Our requirements:

We are looking for a diligent and enthusiastic person to join our small team as a programmer and provider of technology support for our technology and development platforms including MovieSite. The position will be initially on a part time basis with home working. During the period performance will be continuously assessed and subject to outcomes either an extension or permanent position will be offered.

Job description:

We are looking for a talented programmer to create secure and functional code. You will have to provide quality coding solutions both for simple applications and complex information and operating systems. Attention to detail and an analytical mind are essential qualities.

Responsibilities:

- Collaboration with analysts and developers to produce software designs
- Formulate program specifications and basic prototypes
- Transform software designs and specifications into highly functioning code in the appropriate language
- Integrate individual software solutions to high level systems
- Use web-based tools to create advanced web applications
- Test code periodically to ensure it produces the desirable results and perform debugging when necessary
- Perform upgrades to make software systems more secure and efficient
- Collaborate with technical writers to create documentation for user support
- Support and enhance existing systems.

Specific Requirements:

- Ability to program in languages including PHP 7.3 and JavaScript. We also extensively use CFML (Lucee) but specific experience is not required.
- Experience of development frameworks/platforms (e.g. Angular2, Laravel, Fat Free Framework).
- Excellent knowledge with relational databases, particularly MySQL.
- Detail-oriented and excellent concentration ability.
- An analytical mindset and critical thinking.
- Demonstrable ability to discover and fix errors in code.
- BSc / BA in computer science, software engineering or relevant discipline and proven experience as a programmer or relevant role would be an advantage.

To apply, please send your CV with a cover letter to: enquiries@openbrolly.com.
